

# GRP Rooftop Walkways and Platforms

GRP Grating is an excellent choice for Rooftop walkways – they are light weight compared to metal, offer high strength, excellent non slip properties in any kind of weather, UV Stable, can easily be cut on site.

GRP Grating rooftop walkways are also maintenance free as with virtually any grp product once it has been installed it there for it's full working life.

All our grating is available in various sizes and colours to adapt to any working environment. We can also provide GRP Handrails and Platforms to work along side the walkways

# GRP Rooftop Walkways and Platforms

GRP is an excellent product to use when producing a platform for a roof. GRP is extremely strong, lightweight, UV stable weather resistant.

Captrad are able to work with any designers and can even draw up any customer requirements when necessary to create various solutions and we can prefabricate the platforms prior to installation. Due to the weight of the products this reduces vast amounts of money and time on installation costs thus making the use of GRP Platforms the perfect choice for any roof top application.
